Note or Instruction Number:	CPUC Staff Notes or Instructions:	Instruction Category
1	The implementer should use a bottom up or top down approach to claim savings. The implementer should acquire the data to complete the energy model or perform bottom up calculations to claim savings for the site. If YR1 savings are to be claimed at this site, please resubmit the project.	Calculation Methodology
2	The gas model's CV(RMSE) is slightly above threshold $0.0503 > 0.05$.	Calculation Methodology
3	If savings are to be claimed at this site, please calculate the fractional savings uncertainty for those savings.	Calculation Methodology
