Note or Instruction Number:	CPUC Staff Notes or Instructions:	Instruction Category
1	The implementer should use a bottom up or top down approach to claim savings. Project documentation show that the site completed SEM-BRO projects. The implementer should acquire the data to complete the energy model or perform bottom up calculations to claim savings for the site. If YR1 savings are to be claimed at this site, please resubmit the project.	Savings Methodology
2	Opportunity register should have specific dates for completed opportunities. "Spring 2019" doesn't provide enough information for review.	Opportunity Register
