1	The bi-monthly upload included [REDACTED] of savings and [REDACTED] of incentives. In response to our SDRs, the PA updated the standard practice baseline fixtures from [REDACTED] lights to [REDACTED] which are appropriate for a vertical farm. This resulted in lower savings and incentives [REDACTED] and [REDACTED]. Please update savings and incentives in the next quarterly submission.	Baseline		

2	<p>According to the PA, given the very minimal harvesting/turnover time relative to operation over the course of the year, process lights are commonly used in place of ancillary lighting for workers conducting such transitory tasks, and are therefore not switched off during these periods. The PA has proposed to conduct two weeks of monitoring to verify hours of use. Please either extend the M&V period to monitor lighting hours of use during turnover or include harvesting/turnover time in the proposed two weeks of post- M&V.</p>	M&V plan
